Ottawa, Ontario K1A 0C6, Canada

In my paper, published recently in this journal (SMETANA, 2008), an inadvertent error happened when citing the type material of *Quedius bann* by not providing the depository of the holotype, which technically makes this name unavailable according to the current Code (Art. 16.4.2). To remedy this shortcoming, the proper version of the listing of the holotype of *Quedius (Raphirus) bann* is presented below:

Type material. Holotype (male): China: "CHINA: W Sichuan, Pass Zheduo Shankou W Kangding, W slope, 4000 m, 29° 58' N 101° 47' E, 17.VII.1998, A. Smetana [C84]" / "1998 China Expedition J. Farkač, D. Král, J. Schneider & A. Smetana". In the SMETANA collection, Ottawa, Canada.
